

## Wax Coil

### Product Description

This product has been revived through cooperation with our audio partners.

The insulation used for Wax Coils is a special 60 µm quality paper.

The coil is wound with the same 99,99% pure copper foil, also used for Cross Coils.

Each coil is impregnated with a polymolecular paraffin Wax, making the coil hard as a rock!

Each coil is tested with Clio system.

Tolerance +/-2%

#### Wax Coils are available in the following sizes:

16 AWG - 1,33 mm<sup>2</sup> - coil height 24 mm
